Don Birdsall
Director of Marketing
Lift-U, Div. of Hogan Mfg.

Subject: Franklin County Court of Common Pleas

Dear: Mr. Birdsall

Thank you for your excellent technical and customer service support in specifying, detailing, securing permits and installation for the courtroom lifts at the Franklin County Court of Common Pleas in Columbus OH. Our goal was universal accessibility to respond to current and future anticipated ADA/ABA guidelines, and flexibility to adapt to the client's future needs for providing lift access to judges' benches. Your expert guidance during design and construction helped us achieve our goals and navigate the often confusing standards and building inspection roadblocks often associated with low rise lifts of this type. Particularly helpful in this project was your leadership in obtaining a variance from the elevator inspection certificate requirements, and for helping us to clarify the guardrail height requirements. We have now successfully integrated your screw-type lift products into several of our courtroom and courthouse projects, and look forward to working with you in the future.

I would most definitely recommend your product and services to anyone looking for an elegant and reliable solution to courtroom accessibility.

Sincerely

Ryan Critchfield, AIA
