Subject: LIFT-U Lift Installation
New Albany, IN Stake Center

Dear Mr. Birdsall,

I am happy to report that the installation of the LIFT-U at the church in New Albany, IN was very successful. The shop drawings and measurements were correct and informative and the installers were on-site as promised and moved through the installation quickly with no apparent problems.

To the best of my knowledge there have been no incidents or malfunctions of this lift, nor an earlier lift that you had installed for us at another church in southern Indiana. The equipment is of very high quality and is complete with its controls and drive systems, etc.

One reason that I like this lift is that it can be incorporated into wood decorative casework; such as, at the front of a church or other public building for a more finished appearance.

Another thing I like about this product is that it does not require a "pocket" in the floor to receive the platform.

I would have no problem recommending this unit to others for their use in similar applications.

Sincerely,

David Snapp
